Partners for Climate Protection

The Partners for Climate Protection (PCP) program is a network of Canadian municipal governments that have committed to reducing greenhouse gases (GHG) and to acting on climate change. Since the program's inception in 1994, over 250 municipalities have joined PCP, making a public commitment to reduce emissions. PCP membership covers all provinces and territories and accounts for more than 65 per cent of the Canadian population.

PCP is the Canadian component of [ICLEI's Cities for Climate Protection \(CCP\)](#) network, which involves more than 1,100 communities worldwide. PCP is a partnership between the Federation of Canadian Municipalities (FCM) and ICLEI — Local Governments for Sustainability.

The program empowers municipalities to take action against climate change through a five-milestone process that guides members in creating GHG inventories, setting realistic and achievable GHG reduction targets, developing local action plans, and implementing plans using specific, measurable actions to reduce emissions.

CITY OFFICIALS

Everything civic leaders need to know about the Compact, including how to commit.

CITIZENS

Citizens can get involved, encourage their city to join, and build momentum for climate action.

PRESS

News room, press releases, research and contact information for media inquiries.

Launched at the [2014 United Nations Climate Summit](#), the Compact of Mayors is the world's largest coalition of city leaders addressing climate change by pledging to reduce their greenhouse gas emissions, tracking their progress and preparing for the impacts of climate change. [Learn more.](#)

Compact of Mayors

- Steering committee:
 - City-networks
 - UN-Habitat
 - UN Secretary-General's office
 - UN Special Envoy for Cities and Climate
- Endorsed by 25+ organizations
 - WWF, World Bank, WRI, etc.

Key messages

1

An **AGREEMENT** to undertake a transparent approach to reduce city level emissions and vulnerability, and to enhance resilience to climate change.

2

A common method to uniformly **MEASURE GHG** emissions through the Global Protocol for Community-scale GHG Emission Inventories.

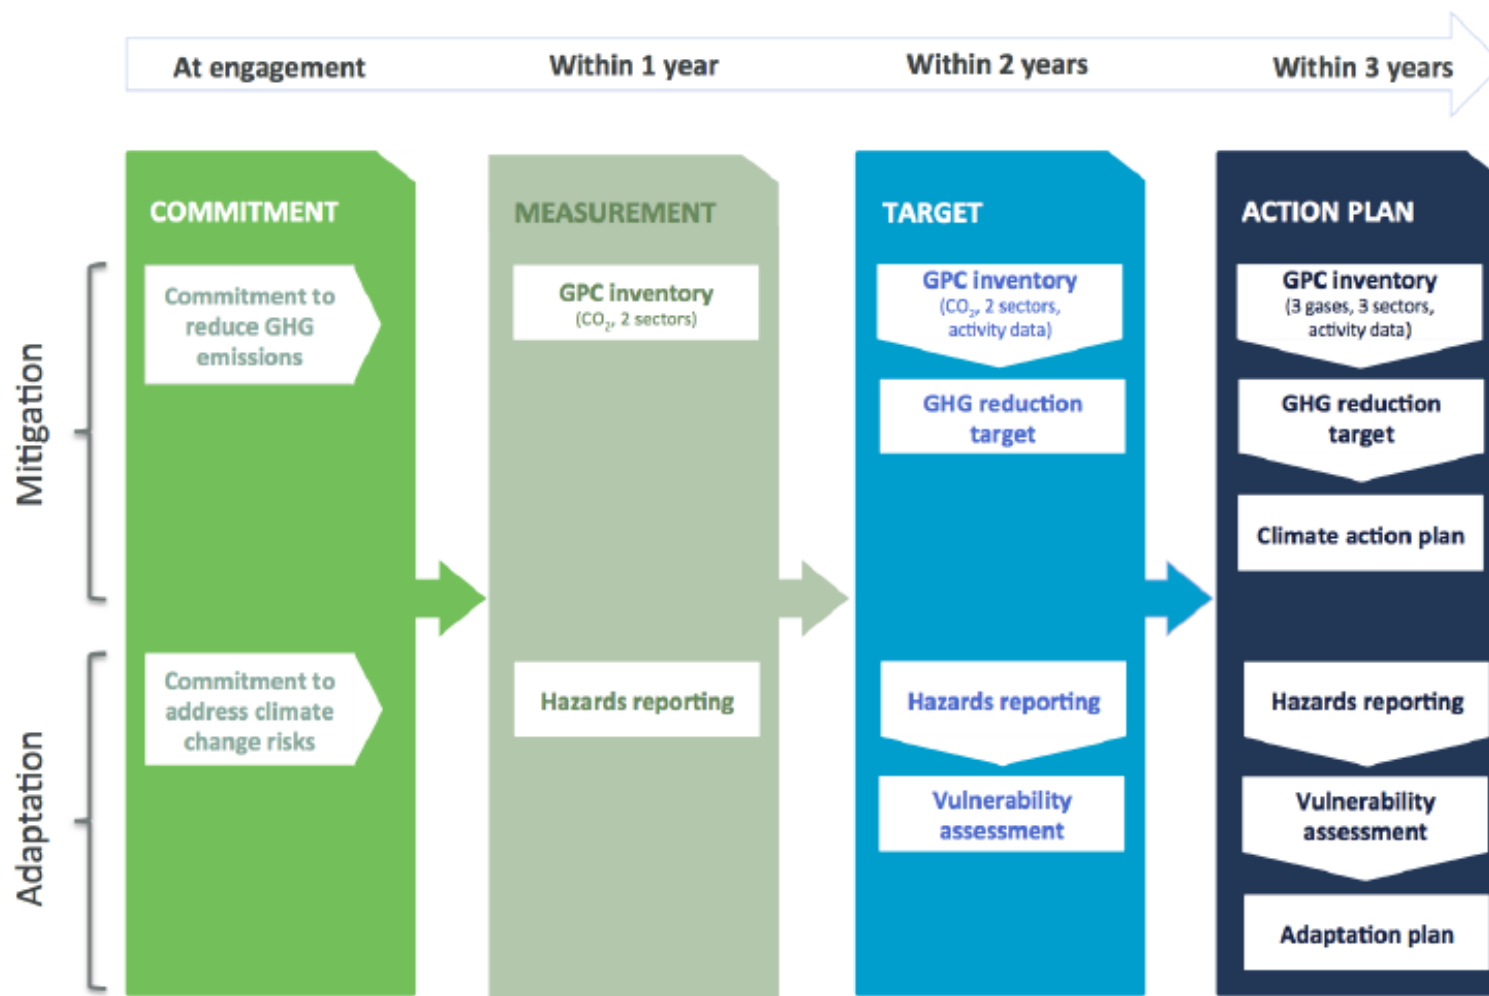

3

A common method to **SET cities' Greenhouse Emissions MITIGATION TARGETS** based on the new GHG Protocol Mitigation Goals Standard.

4

A central **DATABASE**, the carbonn Climate Registry, which will pool data from existing national, regional, and global reporting platforms.

Compact Compliance

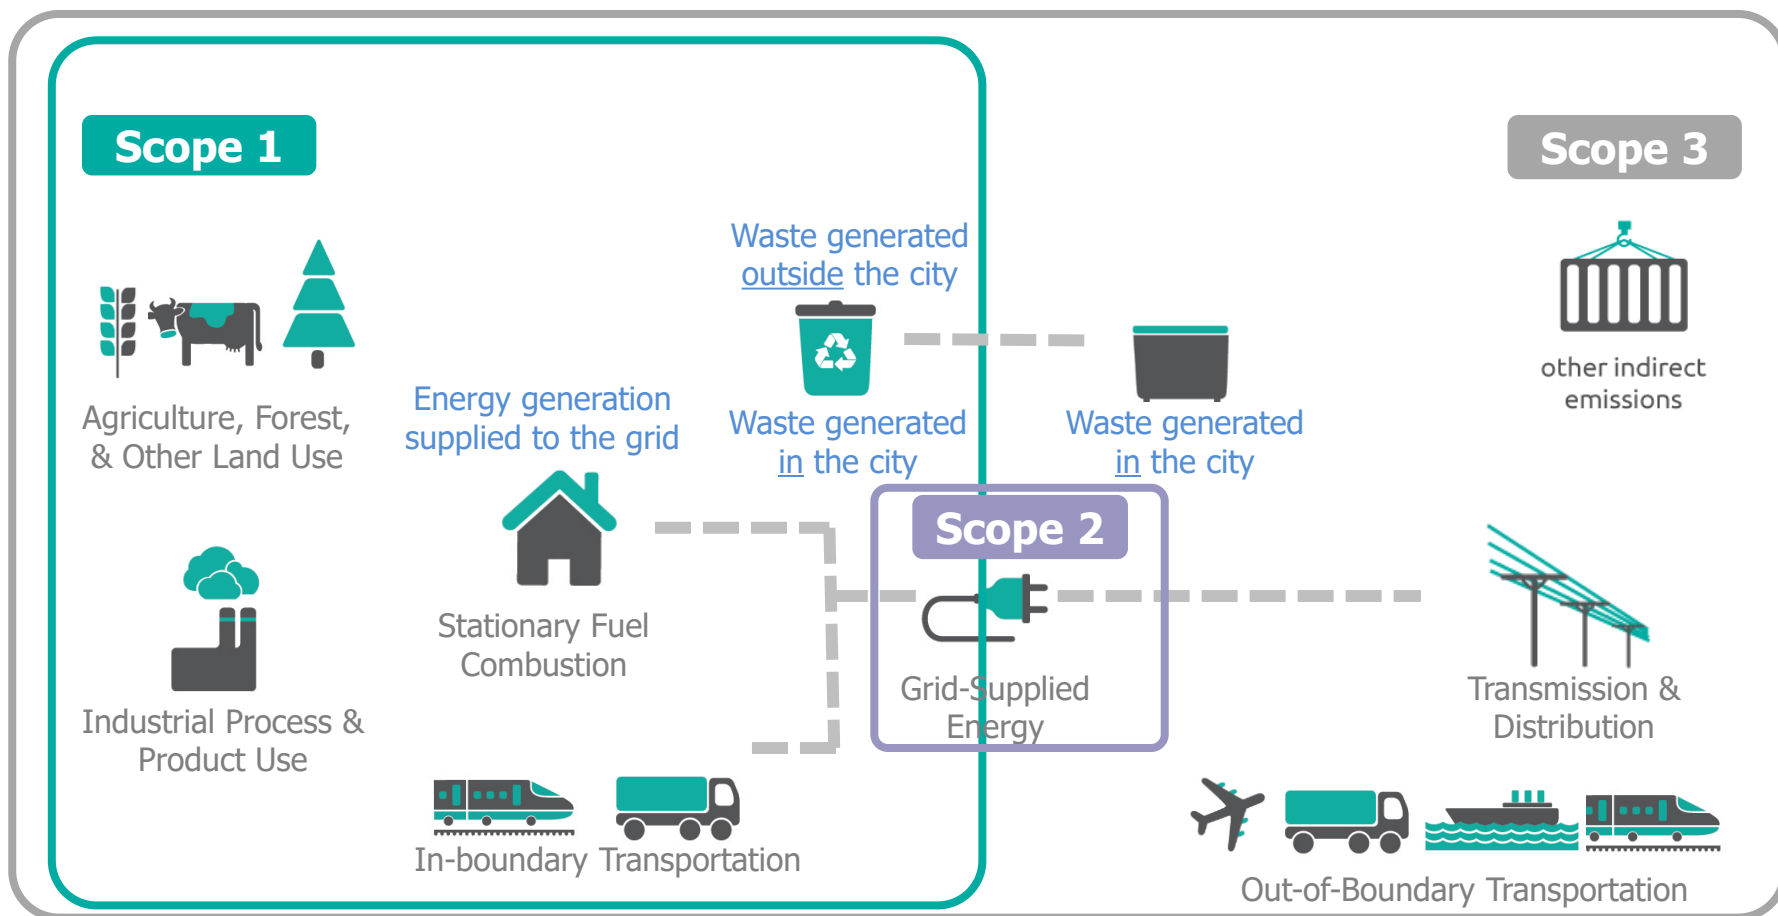

Global Protocol for Community-Scale Greenhouse Gas Emission Inventories

EXECUTIVE SUMMARY

An Accounting and Reporting Standard for Cities

Scope framework

Great Lakes Climate Change Adaptation Project

Opportunities for Ontario Municipalities

- New Project under the Canada-Ontario Agreement (COA) Respecting the Great Lakes
- Led by ICLEI Canada, supported by the Ontario MOECC
- Engaging 30 communities in two project to build capacity
 - Training-the-Trainers: Engaging Stakeholders in Climate Change Assessments
 - Collaborative Implementation Groups: Working Together to Move from Planning to Action
- Second Call for Applications now open! Deadline June 27th, 2016
