

Sandusky Bay

Sandusky, OH (2019-TBD)

Governance: Ohio DNR / EPA

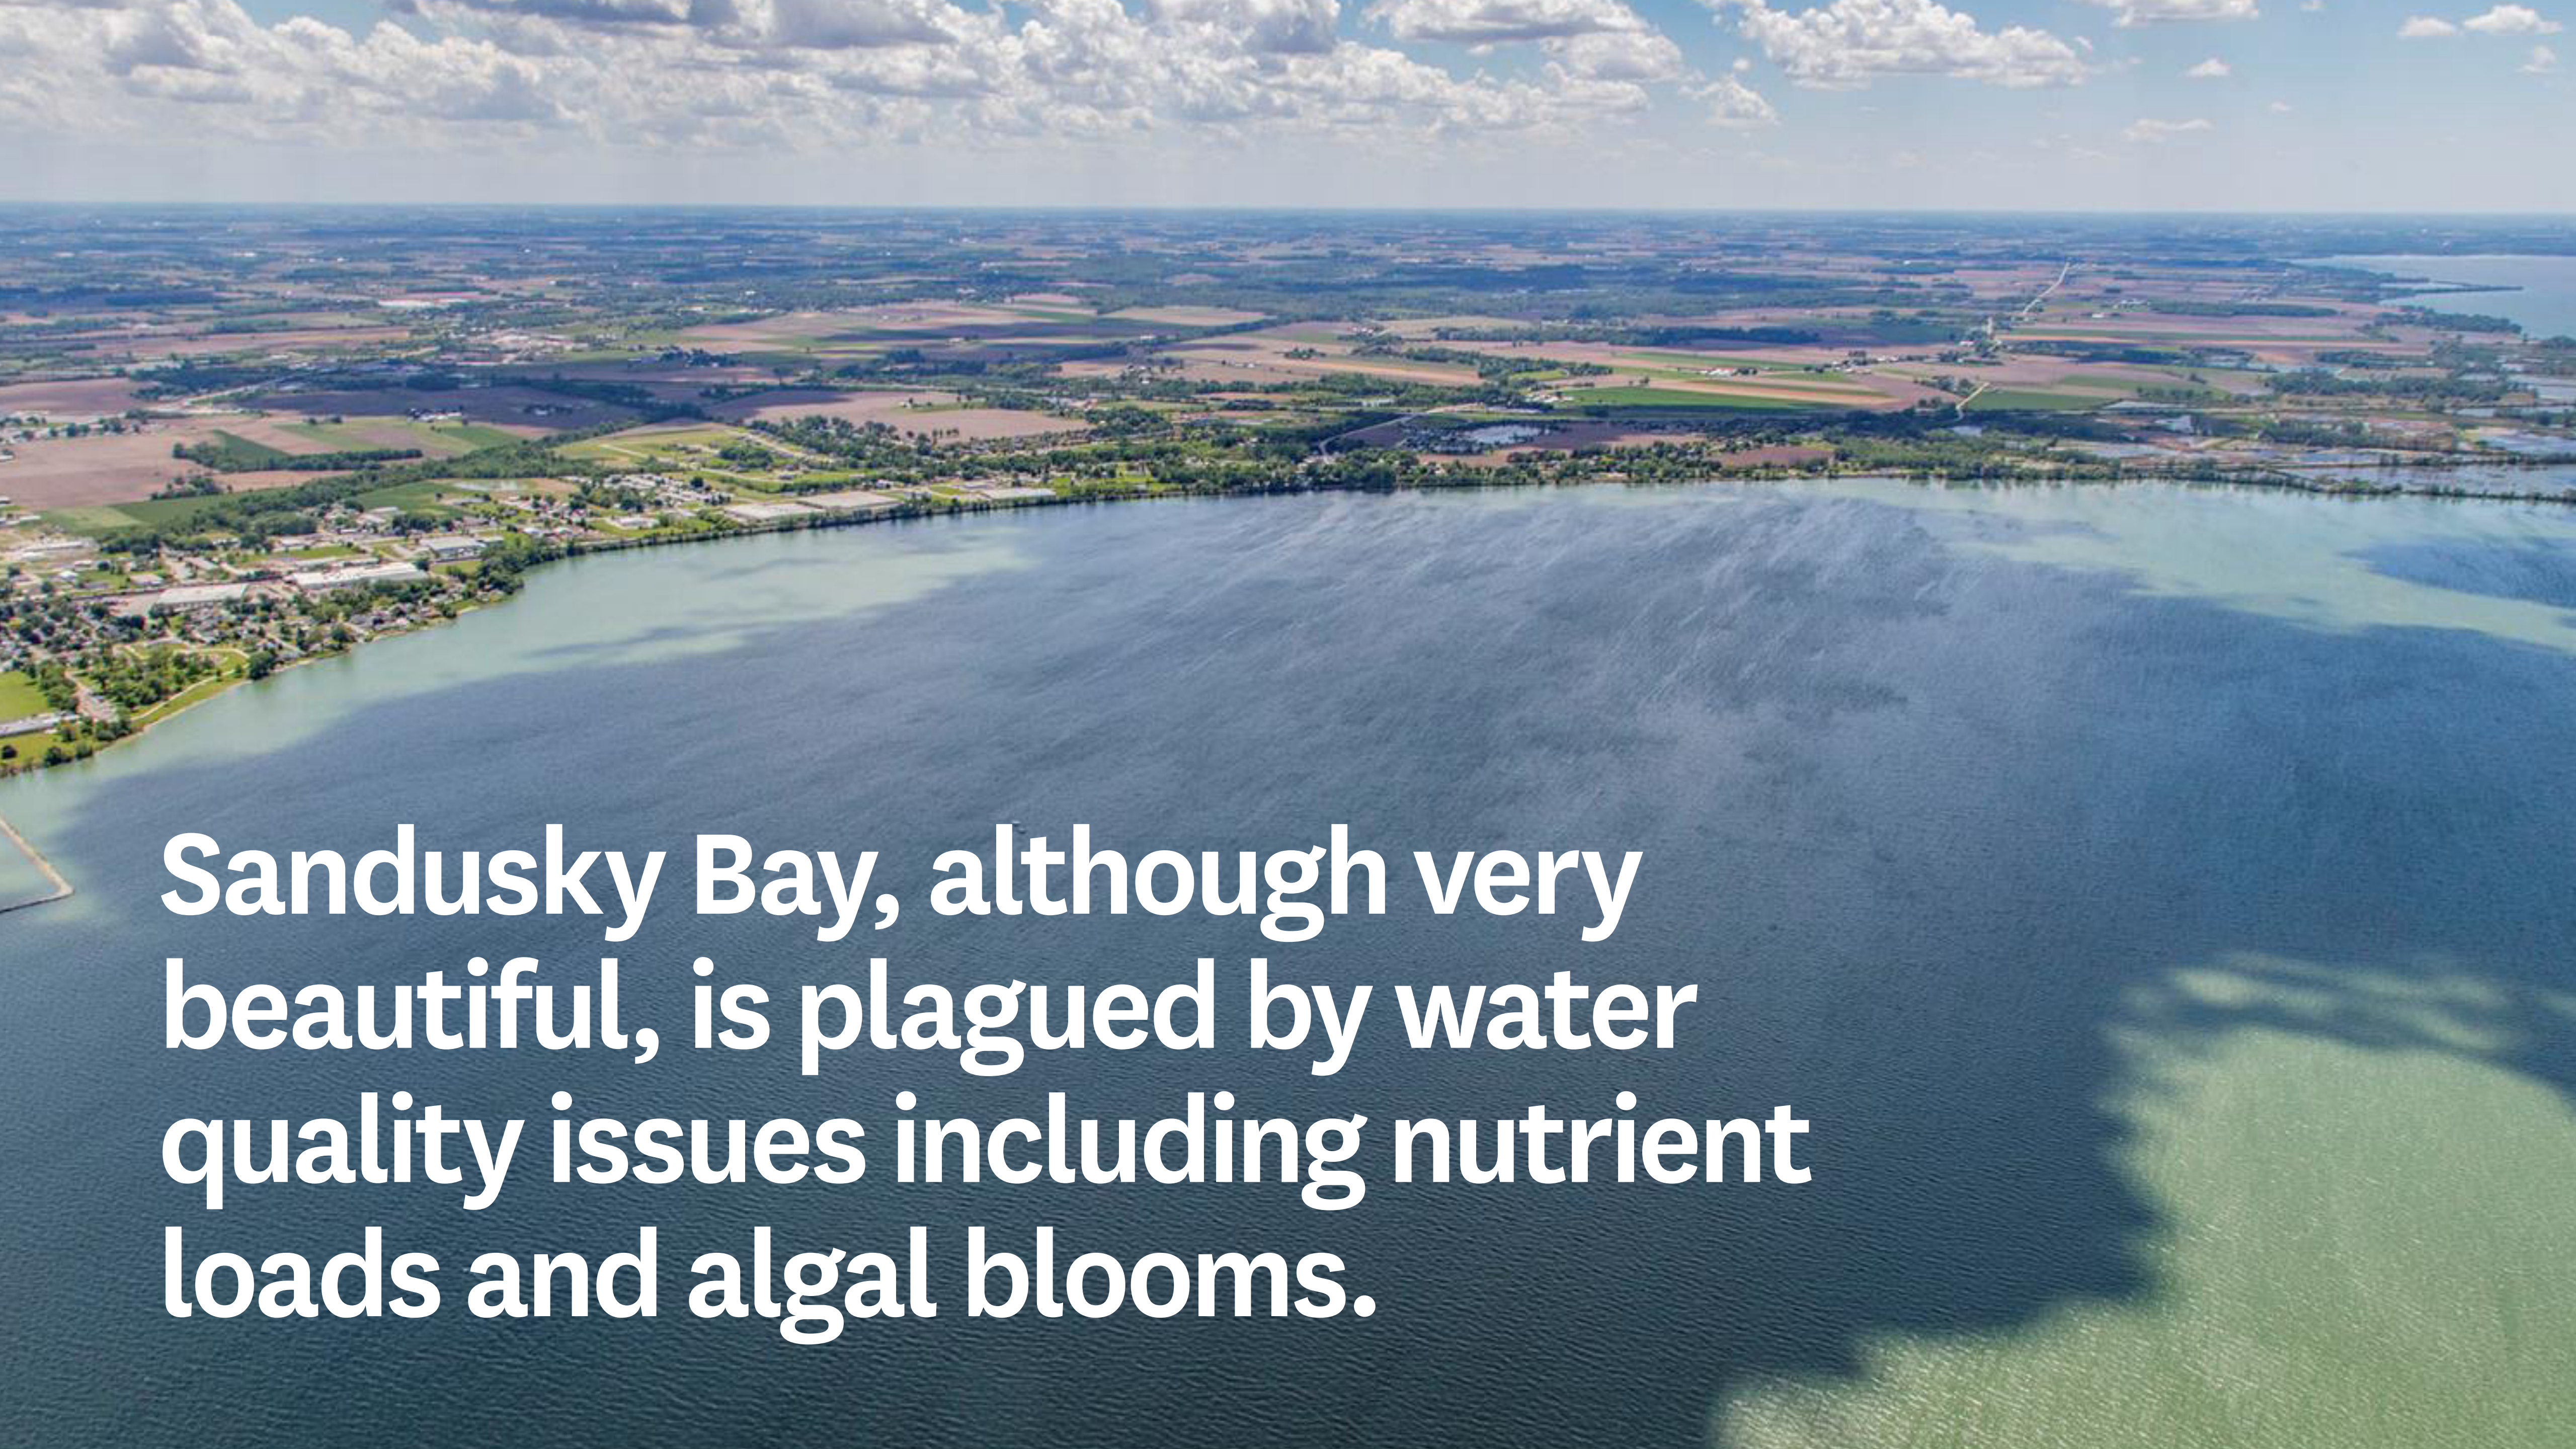

Budget: Multiple Projects \$1-5M

Capital Funding: Federal / State

Management: Municipal Partners

Land Mapping: City Park / Ecological Preserve

Size: 64 Sq Mi. Bay / 20 projects / 10-80 Acres

An aerial photograph of Sandusky Bay, showing a large body of water with significant green algal blooms. The blooms are visible as bright green patches and streaks across the dark blue water, particularly concentrated along the shoreline and in the lower right quadrant. The surrounding landscape includes a mix of green fields, brown agricultural land, and some residential areas with houses and trees. The sky is blue with scattered white clouds.

Sandusky Bay, although very beautiful, is plagued by water quality issues including nutrient loads and algal blooms.

The Sandusky Bay initiative **combines multiple projects** to achieve **shoreline restoration** and **water quality improvements.**
